About Living Cell Technologies: www.lctglobal.com

Living Cell Technologies Ltd (ASX: LCT) develop live cell therapy products to treat life threatening human diseases. The ASX listed, vertically integrated company operates globally through offices in New Zealand, Australia and the United States. LCT focuses on developing treatments where healthy living cells are injected into patients to replace or repair damaged tissue, without requiring the use of toxic drugs to prevent rejection. The company's product portfolio focuses on treatments for people with Huntington's disease, insulin-dependent diabetes and haemophilia.
